Chemical technical data sheet

Products: High-end oily imitation electroplating aluminum paste

Number: 3306

Color: Silver

Grain size (μm) : 6

Chemical composition	unit	The specific data
Flake aluminum powder	Percentage (%)	76
Solvent oil	Percentage (%)	24

Recommended use: Silver metal pigment, mainly used as silver metal coating effect, radiation protection effect.

We hereby certify that the above data are collected using our in-house standards and accuracy. The company's internal standards have reached or exceeded industry standards.

Basic storage and operation methods:

Store away from open flames, high temperature and high static electricity areas, and keep indoor ventilation. The indoor temperature does not exceed 40°C. It is best to operate in a well-ventilated place, do not smoke, and do not expose the container in the air to avoid solvent volatilization.
