

Chemical technical data sheet

Products: High-end water-based imitation electroplating aluminum paste

Number: 5509

Color: Silver

Grain size (μm) : 9

Chemical composition	unit	The specific data
Flake aluminum powder	Percentage (%)	58
Isopropyl alcohol	Percentage (%)	18
Ethyl silicate	Percentage (%)	24

We hereby certify that the above data are collected using our in-house standards and accuracy.

The company's internal standards have reached or exceeded industry standards.

Basic storage and operation methods:

Store away from open fire, high temperature and high static area, keep indoor ventilation, indoor temperature does not exceed 40°C.

It is best to operate in a well-ventilated place, do not smoke, and do not expose the container to the air to avoid solvent volatilization.
